

# MARGARET O. CEKADA

## MEMORIAL LECTURE

PRESENTED BY THE DEPARTMENT OF LANDSCAPE ARCHITECTURE

## MARTHA SCHWARTZ

DSc, FASLA, Hon FRIBA, Hon RDI, RAAR

**ENSURING OUR FUTURE:**

**THE RELATIONSHIP BETWEEN DESIGN AND SUSTAINABILITY**

*Climate change. Global warming. Resiliency. These critical concerns are shaping a new scale of operations for the practice of landscape architecture. It is now more urgent that we advocate for the insertion of natural environments into our urban centers, but we cannot forget the importance of design excellence. In creating places of value that connect with communities on a cultural, personal, and emotional level, we also create sustainability.*

Principal of Martha Schwartz Partners, Ms. Schwartz has over 35-years of experience as a landscape architect, urbanist and artist on a wide variety of projects located around the world. Ms. Schwartz is a tenured Professor in Practice of Landscape Architecture at the Harvard University Graduate School of Design and a founding member of the Working Group of Sustainable Cities at Harvard University.

**APRIL 20, 2017, 6:30 PM RECEPTION, 7PM LECTURE**  
**KATHLEEN W. GLOBAL VILLAGE LIVING LEARNING CENTER**  
**ALBERS-SCHONBERG AUDITORIUM, 125 GEORGE STREET**
