

## SYLLABUS

Spring 2018

Instructor:

Dr. David Tulloch

Department of Landscape Architecture

Room 220, Blake Hall, Cook College

School of Environmental and Biological Sciences

Rutgers, The State University of New Jersey

New Brunswick, NJ 08903

Phone: 848 932-3611

Center for Remote Sensing and Spatial Analysis

Room 133, Environmental and Natural Resource Science Building

Cook College

Phone: 732 932-1581

Email: dtulloch@crssa.rutgers.edu

### **Meeting Times/Places:**

Lecture: M 12:35 - 1:55 (CDL 102)

Lecture: Th 12:35 - 1:55 (CDL 102)

Office Hours: MTh 10:45-11:45 at ENR 133, other times by appointment

### **Learning Objectives**

---

- 1) Students gain an understanding of how communities create policies and regulations to shape their landscapes.
- 2) Students gain a working knowledge of ways in which human activities shape our environment by changing physical or biological processes.
- 3) Students gain an understanding of the bases and development of human and societal endeavors over time and place through an understanding of patterns of land use development and the motivations and processes behind it. [SCLh]
- 4) Students apply concepts about human and social behavior to particular questions and situations as a means of explaining common environmental practices and decisions. [SCLn]

### **Learning Objectives and Assessments**

---

- 1) Students gain an understanding of how communities create policies and regulations to shape their landscapes. **Assessment:** Students are assigned chapters in the textbook that present this information. The framework of the reading is enhanced during lectures by drawing on current events and local examples. Students attend a municipal planning board meeting and write paper about planning and policy issues at the meeting. During lectures, class discussion is generated by posing questions about expectations, preferences, and opinions.
- 2) Students gain a working knowledge of ways in which human activities shape our environment by changing physical or biological processes. **Assessment:** Lectures, videos and reading assignments will convey information

to students. A social and policy vocabulary is developed through the lecture sequence. Students will demonstrate familiarity with terms and basic concepts through tests, with sections used to evaluate each student's ability to apply their knowledge to a current issue.

- 3) Students gain a practical understanding of how participation and human community data inform the development and implementation of environmental policies. **Assessment:** Exam 1: Specific questions directly address human and societal endeavors over time. These include: Navigating environmental behaviors (attitudes, behaviors, role of education, action); Community engagement in planning processes (problem identification, establishment of goals, benefits and costs of different approaches). Exam 2: Specific questions directly address human and societal endeavors over time. These include: Human and Community Inventory (demographics, characteristics, applications for data in planning); Suitability analysis as social process (decision sciences, prioritization, identification of preferred outcomes, multiple criteria analysis)
- 4) Students gain an appreciation of the historical and cultural environment that can be studied, treasured and protected through environmental planning. **Assessment:** Class lectures present examples of culturally and historically significant landscapes deserving of local recognition and appreciation. Lectures and the book introduce tools for identifying and inventorying culturally and historically significant places and forces in the landscape. The final exam emphasizes the techniques and tools that empower planners to protect these important treasures.

#### **Required Texts:**

Steiner, F. 2008. The Living Landscape. 2nd Edition. Island Press.  
ANJEC. 1998. Environmental Manual for Municipal Officials (on CD)

#### **Course Description:**

This is an introductory survey course designed to make the student familiar with the fundamental concepts and mechanisms underlying environmental planning. The course begins with an overview of environmental planning as a field and looks at planning frameworks and processes. Following the inventory and analysis process, the class works through lessons based on different natural features including terrain, soils, wetlands, hydrology, and ecological communities. For each, students learn ways to address these issues with a variety of environmental techniques and methods.

Over the course of the semester, students also become familiar with society's ongoing struggle in balancing its ability to utilize the land and environment and its need to protect these valuable natural resources. Students will learn about the basic concepts and techniques of planning, including the ecological planning model, local government planning and zoning practices, state and federal mechanisms (e.g. NEPA, CZMA), and related legal precedent.

The course also explores issues such as the role(s) government can and should play in the classic "land use drama", investigates how information can be used, misused, and abused in determining outcomes of the public resource decisions, and considers the impact that present and future technologies may have upon the practice of environmental planning.

**Class Outline:****I. INTRODUCTION**

- Environmental Planning processes and frameworks
- Ethical foundations in environmental planning
- Societal and environmental conflicts
- Public participation methods
- Rational planning model

**II. BUILDING BLOCKS OF ENVIRONMENTAL PLANNING**

- Problem and goal identification
- Taking inventory of the environment
  - Topography, soils, water, wetlands, climate, and environmental hazards
  - Demographics, social and cultural heritage, historic preservation issues

**III. FROM ANALYSIS TO PLANNING**

- Suitability analysis
- Testing Planning Ideas
- Implementation and Administration
- Master Plans -- Planning and Zoning

**IV. THE REALITY OF POLICY**

- Policy
- Municipal Planning and zoning
- State and Federal impacts on land use
- Supreme Court precedents for property rights debates
- Growth management techniques
- Purchase and Transfer of development rights
- Planned communities
- Planning case studies on the cutting edge

**Class Schedule:**

- January 18 -- First day of class
- February 26 -- First Exam
- March 10 - March 18 -- Spring Break
- March 29 -- Second Exam
- April 9 -- Assignment 1 due
- April 30 -- Final Lecture
- May 3 -- Final Exam (9am-11am)

([https://scheduling.rutgers.edu/sites/default/files/images/dcs/spring\\_2018\\_exam\\_schedule.pdf](https://scheduling.rutgers.edu/sites/default/files/images/dcs/spring_2018_exam_schedule.pdf))

**Grading:**

- 20% Participation, Quizzes, and Homework
- 25% Test 1
- 25% Test 2
- 30% Final Exam

**Assignment:**

There will probably only be one assignment. Depending upon class progress and opportunities, I retain the right to add additional assignments: Assignment 1 -- Planning hearing review  
For this assignment students will be required to attend a municipal planning board meeting

## **Academic Integrity**

The intentional copying of another student's work or a portion of work and representation of the work as your own work is in direct violation of the University Integrity Policy:

Plagiarism: the representation of the words or ideas of another as one's own in any academic work. It is a violation of academic integrity for a student to aid others in violating academic integrity. A student who knowingly or negligently facilitates a violation of academic integrity is as culpable as the student who receives the impermissible aid, even if the former student does not benefit from the violation.

As a result, any copying and/or "sharing" of exercises, homework assignments, and projects will be treated as Level 2 violations and subject to the sanctions as outline in the Integrity Policy:

1. A failing grade on the assignment.
2. A failing grade for the course.
3. Disciplinary warning or probation.

Repeat violations will be treated as separable Level Three violations and referred to the AIF of the school for adjudication. Please refer to the complete Integrity Policy at: <http://academicintegrity.rutgers.edu/integrity.shtml>.

## **Student Wellness**

Rutgers makes available Counseling through the Student Wellness Services

<http://ubhc.rutgers.edu/swp/>

Access helpful mental health information and resources for yourself or a friend in a mental health crisis.

Counseling, ADAP & Psychiatric Services (CAPS)

(848) 932-7884 / 17 Senior Street, New Brunswick, NJ 08901

[www.rhscaps.rutgers.edu/](http://www.rhscaps.rutgers.edu/)

CAPS is a University mental health support service that includes counseling, alcohol and other drug assistance, and psychiatric services staffed by a team of professional within Rutgers Health services to support students' efforts to succeed at Rutgers University. CAPS offers a variety of services that include: individual therapy, group therapy and workshops, crisis intervention, referral to specialists in the community and consultation and collaboration with campus partners.

Violence Prevention & Victim Assistance (VPVA)

(848) 932-1181

3 Bartlett Street, New Brunswick, NJ 08901

[www.vpva.rutgers.edu/](http://www.vpva.rutgers.edu/)

The Office for Violence Prevention and Victim Assistance provides confidential crisis intervention, counseling and advocacy for victims of sexual and relationship violence and stalking to students, staff and faculty. To reach staff during office hours when the university is open or to reach an advocate after hours, call 848-932- 1181.

Disability Services

(848) 445-6800

Lucy Stone Hall, Suite A145, Livingston Campus, 54 Joyce Kilmer Avenue, Piscataway, NJ 08854

<https://ods.rutgers.edu/>

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability

services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation: <https://ods.rutgers.edu/students/documentation-guidelines>. If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: <https://ods.rutgers.edu/students/registration-form>.

Scarlet Listeners

(732) 247-5555

<http://www.scarletlisteners.com/>

Free and confidential peer counseling and referral hotline, providing a comforting and supportive safe space.

### **Assignment of Grades**

The department uses the following guideline for understanding appropriate grading in its courses and I will follow them for this class:

A – Outstanding – The student demonstrated a superior grasp of the subject matter coupled with a strong ability to present these ideas in an organized and analytical manner. This not only means fulfilling the requirements, but impressing and going beyond the initial expectations of the class.

B – Very Good – The student has demonstrated a solid grasp of the material with an ability to organize and examine the material in an organized, critical, and constructive manner. The assignment and in-class performance reveal a solid understanding of the issues and related theories or literature.

C – Acceptable – The student has shown a moderate ability to grasp concepts and theories for the class, producing work that, while basically adequate, is not in any way exceptional.

D – Unacceptable – The work demonstrates a minimal understanding of the fundamental nature of the material or the assignment with a performance that does not adequately examine the course material critically or constructively.

F – Failure – The student has demonstrated a lack of understanding or familiarity with course concepts and materials. Their performance has been inadequate. Failure is often the result of limited effort and poor attendance which may indicate that the student needs to reevaluate their interest in the subject.

### **Environmental Planning News:**

News relating to Environmental Planning will be posted on the Spaces and Places Blog ([PlacesAndSpaces.Rutgers.Edu](http://PlacesAndSpaces.Rutgers.Edu)).

### **Due Dates and Exam Dates**

Except for circumstances truly beyond the student's control, all assignments are due at the dates and times specified throughout the semester. Projects that are incomplete on the due date should still be submitted on the date it is due to receive at least partial credit. Any work submitted late will be penalized a letter grade for each day past due. Working beyond a due date is both unrealistic in a professional planning setting and unfair to your classmates in this course.

Missed exams will result in a zero unless the student provides a valid excuse consistent with the school's standards for excused absences. Make-up exams will be offered as essay exams.

The final exam date and time are set by the university and cannot be changed except according to university rules.
