INTRODUCTION TO ENVIRONMENTAL DESIGN | COURSE SYLLABUS. 11:550:231 5 CREDITS
Monday 2:00 – 5:00; Wednesday Common Lecture 3:50 – 5:10 & Thursday 10:30 – 3:20
Blake Hall, room 246

Co-Instructors:
Holly Nelson  holly.nelson@rutgers.edu
Blake Hall, rm. 116
Alexis Lo  ajl240@rutgers.edu
Blake Hall, rm. 119
Lain Lomery, TA  eml206@scarletmail.rutgers.edu
Bronson Gallagher, GA  bdg68@scarletmail.rutgers.edu

Office Hours: Before and after studio on Monday/Thursday and by appointment

LEARNING OBJECTIVES
Studio and lecture activities have been developed to accommodate these objectives:
• Introduce core concepts and practices fundamental to Landscape Architecture and Landscape Planning (Design process; interpretation of site; human scale and use of the landscape; form-making) Engage the practice of design as an iterative process and foster experimentation in the making of form.
• Establish vocabularies to describe and analytical frameworks to assess formal aspects of the natural environments.
• Express design intentions through drawing, modeling, recording, and presentation.

PROGRAM GOALS

1. **Explore** space and spatial relationships in 2D and 3D (hand-crafted models).
2. **Apply** design principles at multiple small scales (drawings + models).
3. **Communicate** design ideas (graphic + verbal).
4. Introduce environmental analysis.

Overview:
Introduction to Environmental Design I is the foundation studio for our 2 majors: Landscape Architecture, and Environmental Planning. The studio investigates how landscape design and planning can shape the built environment purposefully, productively, and provocatively. An introduction to the rigor and language of the environmental design process, as well as the tools, techniques, and creative speculation needed to move through the various stages of that process, it touches upon:
- aspects of human use of the landscape,
- plant material in the landscape,
- and landform (using topographic plans, sections, and contour models).
The course is composed of two weekly lectures (studio lecture and common lecture on Wednesday afternoons) and twice-weekly studios. Studio is structured to facilitate students in the expression of their design intentions, providing guidance and opportunity to develop critical thinking and creative skills. Studio activities include site visits and site analysis, design exercises, individual desk critiques, group pin-ups, and project reviews. You will draw, craft models, and “make things” each day. In almost all cases, students have daily assignments due at the start of the next studio when it will be discussed with the instructor and among groups of classmates. You are expected not only to present thoughts on your own designs, but to contribute to conversations and critique about the work of others.

We progress through four projects of increasing complexity to introduce students to design as a process: a concept is refined and developed through iterative exploration and revision. Projects and associated assignments engage students in an investigation of:

- graphic language and representation
- the human body and its activities in the landscape
- generation of purposeful form
- communication of design intent and 3-dimensional form through both modeling and drawing techniques.

Each student keeps a design journal to complement the learning process; it becomes a record of progress and studio learning.

PROJECT DESCRIPTIONS:

[Project 1] **TOPOGRAPHIC MODEL.** Collaborative 3D model.

[Project 2] **3 LANDSCAPES** introduces students to the site visit and seeing the landscape through observation, documentation, analysis, and representation (i.e., the design process—you learn by doing). As a group, students ‘visit’ a series of landscapes with varying natural conditions. Site qualities are discussed as are methods of recording observations (sketching, photography, measurement, and writing). Three programmatic words characteristic of each of the sites are identified and become focal points for creative exploration. A coordinated set of architectural drawings will be prepared, including Plan, Elevations, and Sections.

[Project 3] **CAMPUSS DESIGN CASE STUDY** Students will explore landscape design through research and site exploration. This two-part project includes a case study presentation and campus design exercise. In small groups, students will research award winning, innovative, and creative built landscape designs and apply those lessons learnt to the Livingston Campus plaza. The project’s design component will cover the process and development of a site inventory and analysis map. After surveying the site conditions and limitations, students will develop a concept plan that emphasizes form and function for the Livingston Campus plaza site. The final deliverables include a case study presentation, a site inventory and analysis map, and a design concept plan and section.

[Project 4] **PERFORMANCE LANDSCAPE** emphasizes the translation of an idea/concept (in this case, a painting) into a design. A painting becomes your design diagram. As you analyze the artwork, incorporate the artist’s ideas into your project as you develop a design concept through a series of three-dimensional study models, conceptual and measured drawings, and three-dimensional models. The Section drawing is a powerful tool in the site design process, revealing moments of transformation as you develop 2-dimensional drawings that capture site information contained within the project models. Particular attention is paid to the relationship between form, meaning and the effective communication of design intention. The project demands an increasing level of technical skill in draftsmanship and craftsmanship and an understanding of the iterative process of design.

Materials and Supplies
A list of drafting and model making equipment was distributed for 11:550:237. Additional material will be required throughout the semester. It is imperative that each student be prepared with the necessary equipment and materials for each studio period. It is not acceptable for students to take time from studio to purchase materials.

Attendance and Grading

- All studio assignments and exercises are due at the beginning of the studio period unless otherwise specified. Late projects will be accepted up to a maximum of one week after due date with a loss of one full letter grade. No credit will be given for work more than one week late.
- Course grading is based upon each student’s personal performance and improvement on studio projects and exercises throughout the semester. Attendance, attitude, participation and overall contribution to the studio environment will also be considered.

GRADING

Individual breakdown of your cumulative semester grade (see p. 7 for due dates):

<table>
<thead>
<tr>
<th>Project</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project 1: Topographic Model</td>
<td>5%</td>
</tr>
<tr>
<td>Project 2: Three Landscapes</td>
<td>25%</td>
</tr>
<tr>
<td>Project 3: Case Study Analysis</td>
<td>25%</td>
</tr>
<tr>
<td>Project 4: Performance Design</td>
<td>35%</td>
</tr>
<tr>
<td>Design Journal (50 pages min.)</td>
<td>10%</td>
</tr>
</tbody>
</table>

Note: Project grades include readings and answering questions.

Note: as per Department policy, only one course grade of D is accepted in the major. If a student receives a second D in a 550 course, they cannot progress in the program until one of the D grades is improved.

Final Letter grades will be assigned using the following scale:

- x > 90 A
- 90 > x> 87 B+
- 87 > x> 80 B
- 80 > x> 77 C+
- 77 > x> 70 C
- 70 > x> 60 D
- x < 60 F

The Department of Landscape Architecture uses the following guidelines for understanding appropriate grading in its courses:

**A** – Outstanding—This not only means fulfilling the requirements, but impressing and going beyond the initial expectations and assigned elements of the project. The student has demonstrated a superior grasp of the subject matter coupled with a high degree of creative or logical expression, individual initiative, and a strong ability to present these ideas in an organized and analytical manner.

**B** – Very Good — The student has demonstrated a solid grasp of the material with an ability to organize and examine the material in an organized, critical, and constructive manner. The projects and in-class performance reveal a solid understanding of the techniques, issues and related theories, with some additional work completed.

**C** – Acceptable — The student has shown a moderate ability to grasp concepts and theories for the class, producing work that, while basically adequate, is not in any way exceptional. The performance in class displays a basic familiarity with the relevant literature and techniques.

**D** – Unacceptable — The work demonstrates a minimal understanding of the fundamental nature of the material or the assignment with a performance that does not adequately examine the course material critically or constructively. Students cannot graduate from the Landscape Architecture program with 2 D’s in required 550 classes.

**F** – Failure — The student has demonstrated a lack of understanding or familiarity with course concepts and materials. Their performance has been inadequate. Failure is often the result of limited effort and poor attendance which may indicate that the student is not in the proper field of study.
It will be the responsibility of each student to track their own academic progress throughout the semester. Interim grades will be available to students on an individual basis. Students may make an appointment with the instructor to review interim grades. Appointments must be made at least one week in advance of any meeting.

PROJECTS For each “major” project you will receive sub-grades: design concept and development [how well did you develop your design ideas over the duration of the assignment to meet the stated project goals and provide a creative expression]; drawing craft [the quality of your final drawings]; and model craft [the quality of your final model]; readings and written assignments. Unless otherwise specified in the project description statement, each of the components will be weighted equally. *

FINAL EXAM DATE AND TIME
Final Presentation: December 18 @ 2:00.

HOMEWORK Homework will be assigned at the end of each studio meeting. Typical assignments ask you to make drawings or models. Failing to complete any assignment [for example, developing three alternative designs when four were assigned] or not demonstrating progress in design development [for example, simply re-drawing what was discussed the day before rather than applying the critique to a revised design] will negatively affect your project grades. Specifically, you risk failing the design concept and development component of your grade, and further, the lost opportunity to develop representational skills may contribute to poor drawing and model craft skills.

READINGS Assigned and on Canvas.

JOURNAL Design development (i.e. PROCESS) should be recorded in a design journal that will be handed in for evaluation at the end of each project. The journal should engage the processes of site observation and representation as well as lecture notes (including common lecture), your discoveries about design, and the design process. Remember: you will need to pace yourself and keep up with your journal entries. You are expected to produce, over the semester, a minimum of 60 pages of thoughtful notes, sketches, diagrams, etc. You may print out photographs and glue them into your journal but photographs must be annotated so that we understand what you are seeing with them—so that they communicate your thoughts & observations.

ATTENDANCE The Department of Landscape Architecture requires attendance in all of its classes. All course meetings include Lecture, Studio and Common Lecture. Attendance at scheduled Studio, Reviews, and Lecture sessions is mandatory. If a circumstance arises which prohibits your attendance at any class session, please notify the instructor 24 hours prior to the class and an alternative arrangement may be made. You should also self-report your absence. https://sims.rutgers.edu/ssra/

There will be no opportunity to make up a missed Review, in-class exercise or lecture.

Grading is based upon the individual’s performance and improvement on studio projects and exercises throughout the semester. Attendance, attitude, participation and overall contribution to the studio environment will also be considered. Beyond the above recommendations, this course utilizes the Department’s policy on attendance that reads:

The individual student’s development in studio is largely dependent upon:

- The exposure to and assimilation of a body of information which relates to the field.
- The application of this knowledge through studio projects and problem-solving skills developed through critiques, reviews and interactions during each project.

Rutgers Landscape Architecture curriculum is designed to develop both areas. Attendance and participation in all lectures and studios are essential if the student is to achieve his/her maximum potential. It is the policy of the Department that more than three unexcused absences will result in a step reduction of the final course grade [for example, a B down to a C]. Each additional 3 absences will result in another step reduction.
Attendance will be taken at the start of each class and late arrivals of more than ten [10] minutes will be marked as an absence.

COVID PROTOCOLS
Masks may be required in class (if covid cases increase) and must cover your nose and mouth, as detailed in the Rutgers Community Safety Practices.

SELECTION OF A MAJOR
One objective of this studio is to present to the student the richness of academic careers within majors offered by this department. At the end of this semester each student decides upon a major:
• BS Landscape Architecture
• BS Environmental Planning

The department will support your decision through a strong advising suggestion, based on your studio work and your overall performance in 550 and 573 classes. We think of the two majors as a gradient between design and planning and between a more structured versus a more flexible curriculum. Landscape architecture inhabits the creative/design side of the spectrum (with a structured curriculum); a more flexible curriculum focusing on planning and policy more than form-making situates Environmental Planning. It has been our experience that most students know by the end of the semester if they want to continue taking a studio course every semester until graduation.

STUDENT WORK
It is highly recommended that students keep and store all of the work produced during the semester [including drawing exercises, design development sketches, and study models] in a safe place. A folder made of two large sheets of foam core, taped along one edge will provide an inexpensive and effective means to protect your work. Please remember to keep your own records (photographs, etc.) of your projects as you go along, as they will become part of your professional portfolio.

Submitted drawings, models, photographs, or written papers for any project assigned in Landscape Architecture courses are considered the property of the Department and may be retained in its archives for exhibition and accreditation purposes. All projects will be graded and returned to the student at a location designated by the instructor. Should your drawings be retained by the Department for its professional accreditation or for purposes of exhibition, you will be given the opportunity to obtain a print, scan, or photographic record of your work. Department files are OFF LIMITS to students.

FACILITIES
Studio cannot be taught without reliable facilities. The student is expected to use the facilities responsibly with particular regard to the clearly established rules about their use as specified in the department website. These rules cover access to the building, vandalism, personalization of working spaces, smoking and drinking, use of lockers, use of department equipment, access to the reference collection, and basic rules governing the use of the studios.

Our studio is shared space. Please strive to maintain a clean workspace by keeping all desks and floors clean and undamaged. Drafting tables are covered with vinyl board covers (Borco) that provide a smooth drawing surface. They can be easily damaged by cutting and paint/adhesive residue. Anyone who damages a drafting surface – by cutting into it, marking it with ink, ruining the surface with adhesive, glue or paint, etc. will be held responsible for the replacement cost of $150.00.

All spraying of adhesives or paint must take place outside the building. Ongoing Entomology experiments can be destroyed by using adhesives indoors.
Students may use any one of the lockers located within Blake Hall to store their supplies and equipment; you must supply your own combination lock. Thefts occur, please secure all your valuables.

PERSONAL CIRCUMSTANCES
If you encounter any personal circumstances that inhibit your ability to fulfill the requirements of this course, you should contact the Instructor immediately. Likewise, any student with a special need, circumstance or disability should make an appointment with the Instructor during the first week of class.

ACCOMODATIONS FOR STUDENTS WITH DISABILITIES
Please follow the procedures outlined at https://ods.rutgers.edu/students/registration-form. Full policies and procedures are at https://ods.rutgers.edu/

ACADEMIC INTEGRITY https://academicintegrity.rutgers.edu/sites/default/files/pdfs/current.pdf
The intentional copying of another student’s file [work] or a portion of a file [work] and representation of the work as your own work is in direct violation of the University Integrity Policy:

Plagiarism: the representation of the words or ideas of another as one's own in any academic work.

It is a violation of academic integrity for a student to aid others in violating academic integrity. A student who knowingly or negligently facilitates a violation of academic integrity is as culpable as the student who receives the impermissible aid, even if the former student does not benefit from the violation.

As a result, any copying and/or “sharing” of exercises, homework assignments, and projects will be treated as Level 2 violations and subject to the sanctions as outline in the Integrity Policy:

1. A failing grade on the assignment.
2. A failing grade for the course.
3. Disciplinary warning or probation.

STUDENT WELLNESS SERVICES

Just In Case Web App http://codu.co/cee05e
Access helpful mental health information and resources for yourself or a friend in a mental health crisis on your smartphone or tablet and easily contact CAPS or RUPD.

Counseling, ADAP & Psychiatric Services (CAPS)
(848) 932-7884 / 17 Senior Street, New Brunswick, NJ 08901/ www.rhscaps.rutgers.edu/
CAPS is a University mental health support service that includes counseling, alcohol and other drug assistance, and psychiatric services staffed by a team of professional within Rutgers Health services to support students’ efforts to succeed at Rutgers University. CAPS offers a variety of services that include: individual therapy, group therapy and workshops, crisis intervention, referral to specialists in the community and consultation and collaboration with campus partners.

Violence Prevention & Victim Assistance (VPVA)
(848) 932-1181 / 3 Bartlett Street, New Brunswick, NJ 08901 / www.vpva.rutgers.edu/
The Office for Violence Prevention and Victim Assistance provides confidential crisis intervention, counseling and advocacy for victims of sexual and relationship violence and stalking to students, staff and faculty. To reach staff during office hours when the university is open or to reach an advocate after hours, call 848-932-1181.
Disability Services
(848) 445-6800 / Lucy Stone Hall, Suite A145, Livingston Campus, 54 Joyce Kilmer Avenue, Piscataway, NJ 08854 / https://ods.rutgers.edu/
Rutgers University welcomes students with disabilities into all of the University’s educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation: https://ods.rutgers.edu/students/documentation-guidelines. If the documentation supports your request for reasonable accommodations, your campus’s disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: https://ods.rutgers.edu/students/registration-form.

Scarlet Listeners
(732) 247-5555 / http://www.scarletlisteners.com/
Free and confidential peer counseling and referral hotline, providing a comforting and supportive safe space.
